

Module 6: S3 Bucket Creation Assignment

Problem Statement:

You work for XYZ Corporation. Their application requires a storage service that can store files and publicly share them if required. Implement S3 for the same.

Tasks To Be Performed:

1. Create an S3 Bucket for file storage.
2. Upload 5 objects with different file extensions.

The screenshot displays the AWS S3 console interface. The top navigation bar shows the AWS logo, a search bar, and the user's name 'DHIVYA J'. The main content area is titled 'Amazon S3 > Buckets'. It features an 'Account snapshot' section with a 'View Storage Lens dashboard' button. Below this, there are tabs for 'General purpose buckets' (selected) and 'Directory buckets'. The 'General purpose buckets (1)' section includes a search bar and a table listing the bucket 's3-bucket-assignment-123'. The table columns are Name, AWS Region, Access, and Creation date. The bucket is located in 'US East (N. Virginia) us-east-1' and is 'Bucket and objects not public'. The creation date is 'November 30, 2023, 15:50:29 (UTC+05:30)'. At the bottom, there is a footer with copyright information and links for Privacy, Terms, and Cookie preferences.

Name	AWS Region	Access	Creation date
s3-bucket-assignment-123	US East (N. Virginia) us-east-1	Bucket and objects not public	November 30, 2023, 15:50:29 (UTC+05:30)

Upload Info

Add the files and folders you want to upload to S3. To upload a file larger than 160GB, use the AWS CLI, AWS SDK or Amazon S3 REST API. [Learn more](#)

Drag and drop files and folders you want to upload here, or choose [Add files](#) or [Add folder](#).

Files and folders (5 Total, 485.1 KB) [Remove](#) [Add files](#) [Add folder](#)

All files and folders in this table will be uploaded.

Objects (5) Info

Objects are the fundamental entities stored in Amazon S3. You can use [Amazon S3 inventory](#) to get a list of all objects in your bucket. For others to access your objects, you'll need to explicitly grant them permissions. [Learn more](#)
